

Edison Innovative Power Recognized as Central New York 2019 Economic Champion

CenterState Corporation for Economic Opportunity (CEO) shortlists EIP for annual award with 325 other companies from a field of thousands

SYRACUSE, NY, Nov. 5, 2019 — Edison Innovative Power LLC (EIP) today announced that it has been recognized as a 2019 Economic Champion by CenterState Corporation for Economic Opportunity (CEO).

EIP received recognition at the CenterState CEO's Economic Champions Luncheon on October 29, 2019 at the Oncenter in Syracuse, New York, and was awarded a certificate for its economic accomplishments in 2019.

Each year the event celebrates the Central New York (CNY) region's outstanding businesses and organizations as Economic Champions for having hired new employees; expanded, relocated or made capital investments due to growth; received a local, statewide or national award; or celebrated a significant milestone or anniversary.

Among the thousands of businesses in the region, EIP was one of just 326 Economic Champions to be recognized this year for their collective hiring of more than 3,200 employees, 1.9 million square-feet of expansions, and nearly \$760 million in capital investments.

"Edison Innovative Power represents the quintessential startup here in Central New York. They are local, hiring local talent, and raising local funding. More importantly, they believe in the economic value and quality of life our region has to offer." said Rick Clonan, CenterState CEO VP of Innovation and Entrepreneurship. "As a member of our incubator, The Tech Garden, we are proud to watch as Edison achieves great things."

"We're honored that the ongoing success of the EIP Internship Program and our capital investment efforts have garnered us recognition among a field of distinguished organizations that are strengthening the economy and community here in Central New York," said James Morrison, CEO & Founder of Edison Innovative Power. "We look forward to continuing our partnership with CenterState CEO to bring more technology and manufacturing jobs to the area."
